The death angel visited the home of Arthur Cash and claimed for its victim the loving wife, daughter and sister, Minnie, who had the flu. It was so hard to part with Minnie, but God knows best. We all know she was prepared to go and if we will live the life we ought to we will live in a better world to come, where there will be no sad parting.

We are having plenty of rain in this country now. It rained 48 hours and never stopped. We have plenty of black mud, now.

School is progressing nicely at Waggoner, with Miss Ault as principal and Misses Mary and Bertha Lewis, assistants.

All of you Herald writers don't be ashamed to sign your name.

Hello, E. Billingsley, of Bloomington Springs, come on with your letters.

Elisha Henry, of Defeated, I would like to have a personal letter from you.

I guess all of you Tennessee Republicans are going to vote for Gov. Lowden for president. I am afraid you will make a mistake. He is the big man's candidate. I am sure he won't be for the laboring man.

UNCLE SAM'S PAY ROLL

Puzzled citizens who may be curious to learn why it is costing three and a half times more to run the Government than in 1916 (not counting sinking fund charges on our war debt), may find a partial answer in the discovery that the number of persons on Uncle Sam's pay roll in the District of Columbia today is three times what it was four years ago. There are over three-quarters of a million persons on Uncle Sam's pay roll, not, of course, including those in the railroad service. Of these over 100,000 are in Washington, as against one-third as many in April 1917. Apparently there has been no effort to return to pre-war expenditures. The whole situation is simply another demonstration of how hard it is to reduce governmental expenditures once they have been allowed to swell, how difficult it is to separate patriots from the pay roll once they get on it.—Pittsburgh Post.

A Well Prepared Seed Bed Produces Bigger Crops

When you can make a better seed bed simply by using a disc harrow that does better work, pulls lighter, and lasts longer, why not do it? We can show you just such an implement—one that can be adjusted instantly to penetrate and pulverize the soil thoroughly its entire width in dead furrows, hard and soft ground, and over ridges, as well as on level land.

Next Saturday, or the first time you are in town, drop in and look at the John Deere Model "B" Disc Harrow which we have set up. Get on the seat and operate the levers. Notice that there is a lever for

angling each gang backward or forward so as to make the pull on the horses just right when part of the harrow is working in soft ground and part in hard ground.

And remember to ask us about the third lever. That is the feature you will appreciate because it enables you to give the required pressure to the inner ends of both gangs to make the harrow penetrate at the same depth its entire width in dead furrows or over ridges.

We want you to notice also the neat, substantial construction of this harrow. You will readily understand why it lasts longer.
